

To Whom it may concern

It is my great pleasure to write this letter in support of Miss Pariya Babaie's application to your PhD program.

I co-advised Pariya for her B.Sc. thesis. She is unquestionably one of the most able researchers in my lab (Network Lab, University of Tehran). Pariya is a talented and highly motivated student who has solid background in mathematics and programming.

As Pariya hopes to pursue her higher education in Computer Science, I feel that her undergraduate experience will aid her greatly in this goal. Her research studies in the aforementioned lab required a firm grasp of many of the skills and aspects that are essential to computer science, such as statistics, optimization, and the consideration of machine learning and pattern recognition schemes for the preservation of privacy in cloud and mobile systems. She displayed impressive analytical skills and a keen intellect in those aspects. She proved adept and ambitious in our department, and I expect her to continue to excel in your institution.

In addition to excelling academically, I found Pariya to be a personal delight. She has a unique ability to interact with her colleagues, displaying confidence and inquisitive fervor, while inspiring respect and cooperation from them. Simply put, Pariya is a true pleasure to work with.

Based on my observation of her abilities, I strongly believe she has the potential to be an outstanding student at your program. I therefore highly recommend her for admission.

Please do not hesitate to contact me for more information.

Yours sincerely,

Hossein Shafiei,
ECE Department,
University of Tehran
